

Apex Global Technologies — Annual Financial Report 2024

Executive Summary & Business Highlights

For the fiscal year 2024, Apex Global Technologies reported consolidated revenue of \$148.5 million, representing a 28.4% increase year-over-year compared to \$115.6 million in FY2023.

The Enterprise AI Cloud division was the largest revenue driver, generating \$82.4 million (55.5% of total sales). Gross margins expanded from 68.2% in FY2023 to 74.1% in FY2024 due to infrastructure optimizations and proprietary vector caching architectures.

Total operating income reached \$34.2 million, up from \$21.5 million in the preceding year. Free cash flow stood at \$29.8 million by fiscal year end.

Section 2: Research & Development and Operating Expenditures

R&D; Investments & Infrastructure

Research and Development expenses amounted to \$38.6 million in FY2024, reflecting an aggressive commitment to next-generation retrieval-augmented generation and autonomous agent swarms.

The company established two new research laboratories in Zurich and Austin, employing 120 specialized research scientists and engineers.

Sales and Marketing expenditure totaled \$24.1 million, driven by expansion into the European and Asia-Pacific enterprise markets. General and Administrative costs were controlled at \$11.6 million.

Section 3: Liquidity, Debt, and Capital Structure

Balance Sheet Robustness

As of December 31, 2024, cash, cash equivalents, and short-term marketable securities totaled \$92.3 million, with zero outstanding long-term debt.

The Board of Directors authorized a \$25 million share repurchase program, of which \$12.4 million was executed during the fourth quarter.

Capital expenditures for the year were \$14.2 million, primarily allocated to high-performance GPU clusters and private cloud data centers in North America.

Section 4: Fiscal Year 2025 Strategic Guidance

Outlook & Key Projections

Management forecasts FY2025 revenue between \$185 million and \$195 million, projecting continued enterprise adoption of generative AI copilots and document intelligence platforms.

Operating margin is anticipated to remain between 24% and 27%, with sustained investments in sovereign AI compliance and privacy-preserving multi-tenant deployments.

Chief Executive Officer Dr. Elena Vance stated: 'Our focus on strict factual grounding and zero hallucination has made our platform the benchmark for regulated enterprise workflows.'
